

## The all-new Honda hybrid Civic Hatch SR: An icon reborn

**AUCKLAND December 31, 2024.** The Honda Civic has returned to our shores with a refined, dominant fresh look and feel. Powered by Honda's latest e:HEV hybrid technology and with all-new Google Assistant built-in, the new Civic is where bold innovation meets striking good looks. From the sharp sculpted lines, bold 18" alloy wheels, and rear privacy glass, the Civic strikes a commanding presence.

### **The Managing Director of Honda New Zealand, Mr Nobuya Sonoda, says**

"The Honda Civic is our most recognized model that has a pioneering history. Known for its exceptional driver experience, it's a kiwi favourite that many households are familiar with. Now in its 11th generation our Civic hybrid boasts our latest hybrid technology. It has grown up to become a premium Honda designed for exhilarating drives. We can't wait for our loyal fans to try it for themselves. "

### **e:HEV Technology**

A captivating blend of dynamism and efficiency, the new Civic is powered by Honda's latest technology, e:HEV – a unique two-motor hybrid system combining high environmental performance with driving pleasure.

Like all our Honda hybrids, the Civic self-charges as you go – no plug-ins, no range anxiety, and no road user charges. \* Just a smooth yet spirited drive in an icon reimaged, where fuel-efficiency meets fun.

### **Sports Inspired**

This exciting refresh draws on Honda's racing legacy, using technology from the Type R for superb handling and improved performance. With impressive acceleration and stability, plus secure cornering performance, you'll truly feel at one with this car. Taking from the Type R, the new Civic features four drive modes – ECON, for smooth driving and fuel efficiency; NORMAL for daily driving; SPORT, for those wanting to take advantage of what the Civic has to offer; and INDIVIDUAL to fully customise your driving experience. There's something to suit every driving style and preference.

### **Premium Comfort**

The interior blends comfort and sophistication, with leather-appointed finishes and a panoramic sunroof spanning the front and back seats. A wider windscreen offering improved all-round visibility, class-leading cabin and boot space, and a premium Bose sound system custom-engineered for the new Civic make for a fun, relaxed journey every time.

New in the 2025 Civic is both wireless Apple CarPlay and wireless Android Auto. Your device will seamlessly integrate with the 9" touchscreen infotainment system allowing you to access music, friends, and favourite destinations without distractions. With steering-wheel-mounted controls, you can stay connected and safe at the same time.

### **Google Assistant**

Thanks to the very latest in smart car technology, the Civic comes with all-new built-in Google Assistant. Adjust the temperature, heat the seats, and navigate your route. Controlling your car has never been easier, or safer.

### **Built for Safety**

Honda's advanced sensing technology offers a range of safety features such as front and rear sensors, cameras, and enhanced recognition technology. This includes:

- Honda Sensing – a full suite of features to enhance your driving including Lane Departure Warning, Collision Mitigation Braking System, Blind Spot Monitoring, Adaptive Cruise Control, and Road Departure Mitigation System.
- Parking sensors
- 3-angle reversing camera with dynamic parking aid

### **Available for Order**
